

BAREILLY MEDTECH
INCUBATION & INNOVATION LABS

India's Healthcare Innovation Hub in Tier 2 India

From clinical insight to global impact — BMIL is building a dedicated MedTech, HealthTech, BioInnovation & AYUSH ecosystem that turns doctors into innovators and ideas into enterprises.

India's Healthcare Innovation Gap

A decisive inflection point — and an untapped market

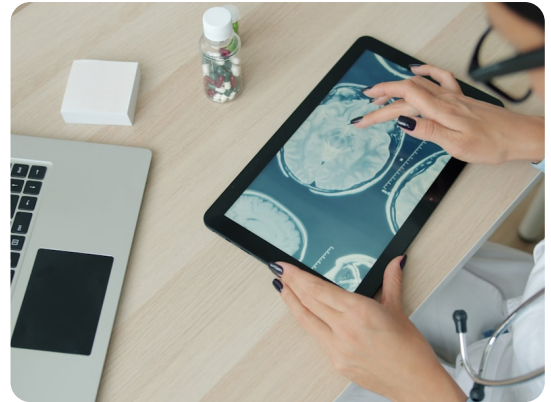

India trains some of the world's finest doctors, pharmacists, dentists, and nurses. Yet the overwhelming majority of healthcare innovation, startup investment, and product incubation is concentrated in major metropolitan cities.

Tier 2 and Tier 3 India — where the real healthcare burden lives — is left without the infrastructure to solve its own problems.

The gap is structural, not accidental. There is no dedicated MedTech incubation ecosystem in Tier 2 North India. No clinical-to-commercial translation pathway. No platform connecting hospital problems to startup solutions — and no capital targeting this white space.

At the same time, India's healthcare future demands precisely what Tier 2 cities are positioned to deliver:

- **Affordable medical devices** designed for emerging markets, not imported
- **AI-driven diagnostics** that work in under-resourced settings
- **AYUSH-integrated innovations** bridging traditional and modern medicine
- **Rural & preventive health solutions** built by those closest to the problem
- **Student-led ventures** from medically trained founders with clinical insight

Clinical insight ready to become commercial innovation

WHY NOW

India's healthtech sector is growing rapidly. The window to build the foundational infrastructure in Tier 2 India — before the space is crowded — is open now.

First-mover advantage in a region with a large patient population, a dense clinical base, and an untapped founder pipeline.

What Is BMIL?

A Section 8 (not-for-profit) company built for impact at scale

BMIL is a dedicated healthcare innovation ecosystem — not a coworking space or a generic incubator. It is purpose-built to support MedTech, HealthTech, BioInnovation, and AYUSH startups from idea to clinical validation to market.

BMIL is designed as a convergence point where:

Doctors	become innovators
Students	become founders
Research	becomes products
Ideas	become enterprises
Investors	access high-impact early-stage deals

Why Bareilly? Why Tier 2?

Strategic advantage, not compromise

India's next innovation wave will not come only from metros. Bareilly sits at the heart of a high-density healthcare corridor in North India, with structural advantages no metro can replicate at the same cost.

- 📍 **Large, accessible patient population** for clinical validation
- 📍 **Dense academic ecosystem** — medical, dental, pharmacy, nursing & allied health institutions
- 📍 **Lower operational costs** vs. metros — same talent, fraction of the overhead
- 📍 **Ambitious young founders** with real clinical exposure and no incumbent ecosystem
- 📍 **Regional hub potential** for North India's healthcare innovation
- 📍 **Rapid infrastructure growth** — Bareilly is on a strong development trajectory

Our aim: to transform Bareilly into a nationally recognized healthcare innovation destination — a model for how Tier 2 India can lead.

A Multi-Dimensional Innovation Ecosystem

Six integrated pillars — each reinforcing the others

State-of-the-art MedTech prototyping & research facilities

Dedicated startup incubation & collaboration spaces

Innovation & Incubation Center

- Startup incubation spaces
- Mentorship & acceleration
- Regulatory & IP guidance
- Founder support systems

MedTech Prototyping Lab

- Device design & build
- Product validation support
- Clinical usability testing
- Testing infrastructure

AYUSH Innovation Hub

- Traditional medicine tech
- Wellness & herbal products
- Integrative care solutions
- Preventive care tech

AI & Digital Health Lab

- AI-assisted diagnostics
- Telemedicine innovation
- Clinical workflow tools
- Digital public health

Innovation Learning Hub

- Ideation labs & hackathons
- Startup education programs
- Innovation bootcamps
- Entrepreneurial mentorship

Industry Collaboration

- Corporate co-development
- Pilot & sponsored projects
- Joint research programs
- Innovation challenges

Multiple Ways to Invest & Engage

Whether you lead with capital, CSR, or strategic partnership — there is a structured pathway for you

PARTNERSHIP TYPE	WHAT IT INCLUDES	WHAT YOU GET
CSR Partnership	Innovation sponsorship programs, student grants, rural health initiatives, women-in-healthcare entrepreneurship programs, AYUSH innovation programs, healthcare challenges	CSR compliance + brand alignment with healthcare, education & social impact — highly auditable outcomes
Infrastructure Naming	Naming rights for innovation halls, MedTech labs, AYUSH centers, AI labs, prototyping labs, auditoriums, startup pavilions & founder lounges	Long-term institutional visibility , brand integration across events, media & national ecosystem recognition
Startup Investment	Seed funding, innovation challenge prizes, early-stage venture support, clinical pilot funding, product validation co-investment, angel ecosystem access	Early access to a curated pipeline of clinically-grounded MedTech and HealthTech startups before they reach broader markets
Event Sponsorship	MedTech summits, innovation hackathons, AYUSH conclaves, investor-founder meets, AI conferences, startup showcases, national competitions	Direct engagement with healthcare founders, researchers & institutions; brand visibility across India's Tier 2 innovation circuit
Research Collaboration	Sponsored research, translational healthcare projects, innovation fellowships, clinical validation programs, joint product development	IP co-creation , academic credibility, and access to a deep clinical research pipeline

Every investment directly strengthens India's healthcare innovation pipeline — with measurable outcomes across startups supported, products validated, founders mentored, and healthcare problems solved.

Your Investment Creates Four Kinds of Impact

Healthcare, education, economic, and national — all from a single strategic partnership

Healthcare Impact

- Affordable medical technologies reaching underserved populations
- Improved diagnostics and rehabilitation devices for rural India
- Preventive health systems built for real-world conditions
- AYUSH-integrated solutions bridging traditional and modern care

Educational Impact

- Medical and pharmacy students gain hands-on founder experience
- Innovation-led learning transforms healthcare curriculum
- Skill development pipelines for India's next generation of clinician-entrepreneurs
- Startup culture embedded inside healthcare education

Economic Impact

- New startups and employment opportunities rooted in Tier 2 India
- Regional innovation growth that retains talented graduates locally
- Local economic development driven by a knowledge economy
- A high-value innovation cluster for North India

National Impact

- Indigenous innovation reducing India's import dependence for medical devices
- Healthcare technology leadership built outside metros
- Startup ecosystem expansion to where India's real health burden lives
- A replicable model for Tier 2 innovation across the country

The Compounding Effect

Every startup that succeeds here validates a product, creates jobs, solves a real clinical problem, and signals to the next cohort of innovators that it is possible. Your investment does not fund one company — it seeds an ecosystem.

Strategic Advantages for Partners

Six reasons BMIL is the right investment

ACCESS

Early pipeline access — engage with next-generation healthcare startups before they reach broader markets or raise institutional rounds

ECOSYSTEM

Strong institutional anchor — built within a growing academic and clinical network, providing validated deal flow and credible co-investment signals

TIER 2

First-mover advantage — participate in India's most promising emerging innovation region before it becomes competitive and expensive

BRAND

Meaningful brand positioning — align with healthcare innovation, education, social impact, and entrepreneurship: four high-visibility national priorities

LEGACY

Long-term institutional visibility — naming rights, event presence, and ecosystem recognition that outlasts any single campaign

IMPACT

Legacy with purpose — become part of building an ecosystem that will outlast any individual grant, CSR cycle, or investment round

Where We Are Headed

BMIL's long-term goals for the ecosystem

- Nationally recognized MedTech innovation hub
- Leading AYUSH innovation ecosystem in North India
- Regional startup launchpad for healthcare ventures
- Translational research center with clinical pathways
- Catalyst for affordable healthcare technologies
- Bridge between healthcare education and entrepreneurship
- Model incubation ecosystem for Tier 2 India
- Globally connected, locally rooted innovation network

BMIL is not building for the next fiscal year. It is building the infrastructure that India's healthcare startup ecosystem will run on for the next two decades — and your partnership helps lay that foundation.

OUR VISION

"One of India's most impactful MedTech and AYUSH innovation ecosystems — globally connected, rooted in Tier 2 India, accessible to every young healthcare innovator."

Join the Healthcare Innovation Movement

India's healthcare future cannot be built only in metropolitan corridors.

The next generation of transformative healthcare solutions will come from ecosystems that combine clinical insight, young talent, affordable innovation, and regional ambition. **BMIL is building that ecosystem — and we need partners who see what we see.**

We Invite You to Be Part of This

Whether you lead with capital, CSR, strategic partnership, or a shared belief in India's healthcare future — there is a place for you in the BMIL ecosystem.
